ENGINE CONTROL CABLES - International Only

FEATURES

- All cables have stainless steel end terminals.
- Standard cables use stainless steel Lubricore core wire for smooth operation and long life.
- Midrange cables use a heavier jacket and stainless steel Lubri-core.

A complete range of control cables to suit all applications available in “standard”, “midrange” and “supreme” styles.

Gen II type cable designed specifically to be used with Mercury 4000 series controls.
