

CH4451P / CH4481P FLUSH MOUNT CONTROLS

APPLICATIONS

For single or dual station applications with single or twin engines.

FEATURES

- Single action design (one lever for throttle one for shift).
- Dual station capability.
- Stylish look with either straight or raked handles.
- Positive detents for shifts.
- Push or pull to operate throttle and/or shift.
- Includes hardware for two 3300/33 type cables.
- Optional neutral safety switch.
- Adjustable friction for precise throttle operation.
- Standard control suits 33C type cables.

Stylish low profile flush mount design available in two style options. Single function (each lever controls shift or throttle). Suits 33C type cables.
