SSCX XTREME™ Cable Features

- Based on the current industry leading Xtreme™ technology
- Splined ridges on the inner liner allow close contact with core
- With minimum contact the core glides freely
- Tight fit for minimal lost motion
- Reduced friction for extended cycle life
- Robust construction support highest steering loads in the mechanical range

A brand new Xtreme™ steering cable was designed specifically for this system. This cable offers lower backlash and is more efficient than a standard steering cable.

It provides the lowest ease of effort, a close “fit” of the core to liner for lowest lost motion. The concept provides the “tight” fit of core to liner yet allows area for lubrication.

The design of the helm allows higher loads to be placed into the cable requiring this new design cable. There is a quick connect feature on both the steering cable and spent travel tube for easy, quick installation.

XTREME™ MECHANICAL STEERING SYSTEM

Smoothest and lowest steering effort mechanical helm offered in the market place yet still offers easy installation.

Complete steering system including new helm, high efficiency XTREME™ steering cable design and new style bezel.

Quick connect feature on both steering cable and spent travel tube for easy quick installation.

Installs in same mounting pattern and bracket location as current Teleflex Marine steering systems.

Smallest footprint possible to accommodate small/tight dash helm stations.

Made, designed and assembled in the USA.

Components

This complete new steering system includes new helm, high efficiency Xtreme™ cable and new-style bezel. It is also available with Sport or Sport Plus tilt mechanism.

Small installation footprint and fits all existing installations

Reliable Zamac casting and zinc plated steel construction

Improved high efficiency custom gear train

Improved NFB function for smoother release

New Helm

The patent pending helm has a complete new gear train designed to provide smooth feel, minimal backlash and low effort at the wheel. It also offers the smoothest NFB clutch release and has a smaller footprint than the current 4.2 helm. All castings are designed to reduce weight while offering superior strength.

Patents Pending on Helm, Cable and Bezel.

Application Guide

CONFIGURATION	HELM		BEZEL/TILT MECHANISM		STEERING CABLE		NOTES
	Part No.	Qty	Part No.	Qty	Part No.	Qty	
Standard Helm NFB	SHX7606	1	SX76061	1	SSCX64XX	1	Add suffix B to part numbers for bulk items.
Tilt Helm NFB	SHX97606	1	SH91800	1	SSCX64XX	1	
Standard Helm Non-NFB For OEM Applications Only	SHX7626	1	SX76261	1	SSCX64XX	1	Add suffix P to part numbers for packaged items.
Tilt Helm Non-NFB For OEM Applications Only	SHX97626	1	SH91800	1	SSCX64XX	1	

New Bezel

New style, patent pending, bezel keeping with the design of the SH91900 tilt and hydraulic helm pump designs.

XTREME™ Steering is a perfect replacement for current inboard mechanical systems up to 34 feet with one engine.

Easy System Installation

There is a quick connect feature on both the cable and spent travel tube side. You will notice the normal steering cable installation side marked on the casting for easier identification. No tools are required to snap the steering cable or spent travel tube in place which means quicker installation for the boat builder.

No bleeding of hydraulic system or electrical wiring is required.

This new system fits the standard Teleflex dash cut out with standard Safe-T and 4.2 bracket. The custom helm is also available with the SH91800/SH91900 tilt mechanism.
