STATS

SIERRA TOUCH AND TEST SYSTEM

MULTIPLE
MARINE ENGINE
DIAGNOSTICS

FROM THE FACTORY OF INNOVATION

STATS® (Sierra Touch And Test System) is an innovative handheld engine diagnostic tool from Sierra. STATS® allows the marine technician to plug into a marine engine's Electronic Control Module (ECM) and diagnose problems without the need of a laptop or PC. Technicians will save time - and dealers make more profit - moving directly to the job, with one quick and easy to use diagnostic tool that covers multiple engine manufacturers. Technicians can even perform engine diagnostics while the boat is still in the water.

In addition, ECM diagnostic software and computer test systems have typically been available only to franchised or authorized dealers of each particular brand. With the STATS® engine diagnostic tool, any dealer, franchised or independent, can now have access to this important service capability; creating opportunities to work on any of several popular engine brands.

USER FRIENDLY

Thanks to its intuitive user interface, technicians will find STATS® easy to use. The lightweight console can be comfortably held in either hand, and the technician can navigate on-screen using clearly marked touch screen/function keys. Fault codes, live system tests and other service data is clearly readable on the STATS® 6-inch monochrome screen.

ONE SYSTEM MULTIPLE OPERATIONS

STATS FEATURES & BENEFITS

- Plug and Play Design for Quick and Easy Diagnosis
- Increased Profitability by Expanding Offered Services and Faster Repair
- ECU Identification for Engine Verification
- Fault Code Reading for Quick and Accurate Isolation of Engine Concerns
- Fault Code Clearing after the Concern has been Corrected
- Possible Causes of Faults to aid in diagnosis
- Displays/Records Live Data for monitoring engine parameters
- Freeze Frame Data for monitoring parameters when a fault occurred
- Performs Engine System Functions
- Component Actuation for Testing Component Operation
- Maintenance Light Reset
- Service Hour Data to monitor the RPM/Temp ranges by Hours
- PWC Key and Remote Programming
- Splash/Vibration Resistant for the Harsh Marine Environment
- Free Internet Software Updates for the latest available software
- Print & Save Service Results for shop and customer records
- USB, PC Interface for ease of updating and creating service printouts
- Diagnostic & Sierra Parts Catalog Software for Maximum Versatility

ENGINE COVERAGE

Hydrospace®/Benelli®/Weber®

Yanmar®

STATS IQ

SIERRA TOUCH AND TEST SYSTEM

GET TO KNOW YOUR ENGINE.

WHAT IS SIERRA IQ?

Sierra InfoQuest (iQ) is an informational database for marine engines and serves as a supplement to the STATS printed instruction manual. Sierra iQ also displays all of the applications that Sierra STATS is currently able to connect with.

WHAT ARE THE BENEFITS OF SIERRA IQ?

Sierra iQ allows the user to view all the basic information on the engine. It also allows the user to see what software, cables, and hardware are required to connect the STATS diagnostic tool to an engine. Pictures and descriptions of the Data Link Connector (DLC) are available on most models when properly logged in with Username and Password and provides the user with tips and hints about the engine to aid in diagnostics. Sierra iQ is also equipped with a feedback function that allows users to add information to each engine allowing STATS users to support each other as well.

HOW DO I DOWNLOAD IT?

In order to gain full access, users will need to login with the email address registered to the user's STATS console using the serial number of the STATS console as the password. To gain Public access that displays application and cable information only, users will click 'Sign In' and then 'Sign In as Guest' in the sign in dialog box. The web-based version is free of charge at www.sierra-iq.com. For iOS and Android users, a mobile version is available for a one time purchase of \$0.99 in the App Store for iPhone/iPad and Google Play for all Android devices.
