SIERRA EXPANDS 2016 LINE WITH OVER 150 NEW PRODUCTS

SeaStar Solutions' Engine and Drive Parts Division Introduces New Products Dealers Need To Maintain And Repair Today's Recreational Marine Fleet

(September 2015 - Southampton, UK) - Sierra International is expanding its 2016 product line to offer dealers an even more complete inventory of aftermarket engine and drive parts, and accessories. The company is adding a wide range of new engine parts for all late model outboard, marine and PWC engines, as well as marine generators. All the new products can be found in Sierra's new 2016 product catalogue, and their new online parts lookup system called SONAR is now online as well.

"As the marine market evolves, Sierra is keeping pace with the new products and systems that dealers need to maintain and repair today's high tech engines," said Tom Douglass, Vice President of Sales and Marketing for SeaStar Solutions. "Whether it's a major component like a high pressure fuel pump or alternator, or a seemingly small gasket or O-ring, we pride ourselves on having the right part for practically any job – and now we're making it easier than ever to get it."

Highlights of new-for-2016 Sierra products include dry-joint manifolds and related gasket kits for newer OEM engine blocks, as well as alternators for popular Honda outboards. Dealers will also find an expanded lineup of fuel filtration and oil change kits for Yamaha outboards, and remanufactured TKS-style carburetors for 5.0- and 5.7-litre Mercruiser engines. In addition, Sierra is adding high flow cylinder heads to their High Performance section.

Sierra has also recently announced a new online parts lookup system. The Sierra Online Application Resource (Sonar) will provide distributors, dealers and boat builders with an easy-to-use tool to research, identify and cross-reference the parts they need online. Dealers are invited to check out the new system by visiting catalog.seastarsolutions.com.
