NEW XTREME SIDE MOUNT AND SINGLE AND DUAL TOP MOUNT CONTROLS FROM SEASTAR SOLUTIONS OFFER IMPROVED USER EXPERIENCE

Proven, Robust Mechanical Systems Now Feature Enhanced Ergonomics and Upgraded Features

(October 2016 - Southampton, UK) - SeaStar Solutions has introduced their new Xtreme line of side mount and single and dual top mount controls. These new dual-function Xtreme controls have not only been designed to offer users the most comfortable grip possible, they also offer some of the most advanced features available. Importantly, they are built to SeaStar Solutions' Xtreme standards of engineering and reliability and pair perfectly with SeaStar's Xtreme control cables for optimal performance.

The Xtreme side mount control features a beautifully redesigned handle with a new ergonomic grip that comfortably fits a wide variety of hand sizes. The neutral interlock lifter is located beneath the grip and the trim switch is now more naturally operated by the thumb. Throttle friction can also be adjusted to match the user's preference.

The same enhanced ergonomics and improved switch placements can be found on the new Xtreme single and dual top mount controls. In addition, both top mount controls offer optional neutral lock-out lifters, which protect against the control being inadvertently knocked or bumped into gear.

A new centre console side mount Xtreme control is also available for a wide range of popular boats. This control features a specially designed low profile handle that is easy to operate without being in the way. The trim switch location has also been positioned for easy activation using your thumb.

The inner workings of all these new controls continue to exemplify SeaStar Solutions' commitment to robust components and reliable performance. New Xtreme controls deliver the same 2.38:1 mechanical advantage of other SeaStar controls and are made of corrosion resistant materials engineered to provide years of use in harsh fresh and saltwater environments.

Continued overleaf...

Available in chrome or black, Xtreme controls have been designed to match seamlessly with SeaStar 3300/33C Xtreme control cables, however, they will also accept a range of OEM cables. These controls feature “easy-on” connections and can be configured in either push or pull actuation modes to streamline installation. Please consult your dealer or distributor for detailed ordering information.
