SEASTAR SOLUTIONS INTRODUCES NEW ARGENT PRO SERIES INSTRUMENTS

Red “After Dark” Dial Graphics and Illuminated Orange Pointer Staff Improve Night Time Visibility

(October 2016 - Southampton, UK) - SeaStar Solutions, the marine industry leader in steering and control systems, is introducing its new Argent Pro Series analogue instruments at the 2016 International Boatbuilders Exposition in Tampa, FL.

New graphics and new lighting features set the Argent Pro apart from other gauges. During daylight hours, bold, black numbers and indicator lines are distinctly set off from the clean, silver/white background making the instruments easy to read, even at a glance. After dark, a specially designed light pipe evenly illuminates the translucent dial face and directs light to the fade resistant, polycarbonate orange pointer. Dial graphics light up in red so the captain can clearly see his instrument readouts and maintain a proper lookout.

All Argent Pro instruments use anti-scratch glass with a fog resistant coating. Low profile bezels precisely match the curvature of the lens to eliminate any “lip” that might trap or hold water.

Argent Pro instruments are compatible with most major brands of outboard, inboard and sterndrive engines. Wiring is internally shielded to prevent interference with other onboard electronics.

Argent Pro instruments are available in a full range of 2-inch (51mm) and 3-inch (76mm) instruments for all standard applications. 5-inch (127mm) instruments are available for speedo and tachometer. For more information on Argent Pro Series instruments, or any of SeaStar Solutions products for marine applications, please visit www.seastarsolutions.com.
