

DK4220 SMARTSTICK KIT

Compatibility with SeaStar Heavy Duty Jackplates

NOTICE

The current design of the SeaStar Heavy Duty Jackplates, JP4040HD (4" setback) and JP4060HD (6" setback) are not compatible with the installation of an aftermarket SmartStick sensor kit, DK4220.

The SmartStick sensor is available as a pre-installed option with SeaStar Jackplate models: JP4040HD-SK (4" setback), and JP4060HD-SK (6" setback).

The next generation of Jackplate design will provide aftermarket SmartStick installation compatibility with all SeaStar HD Jackplates.
