# digital integration

FOR MARINE APPLICATIONS

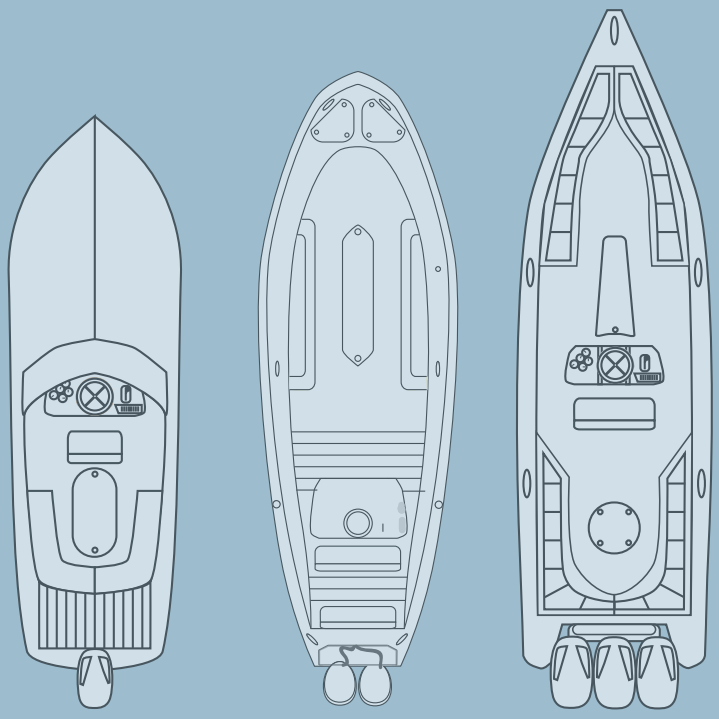

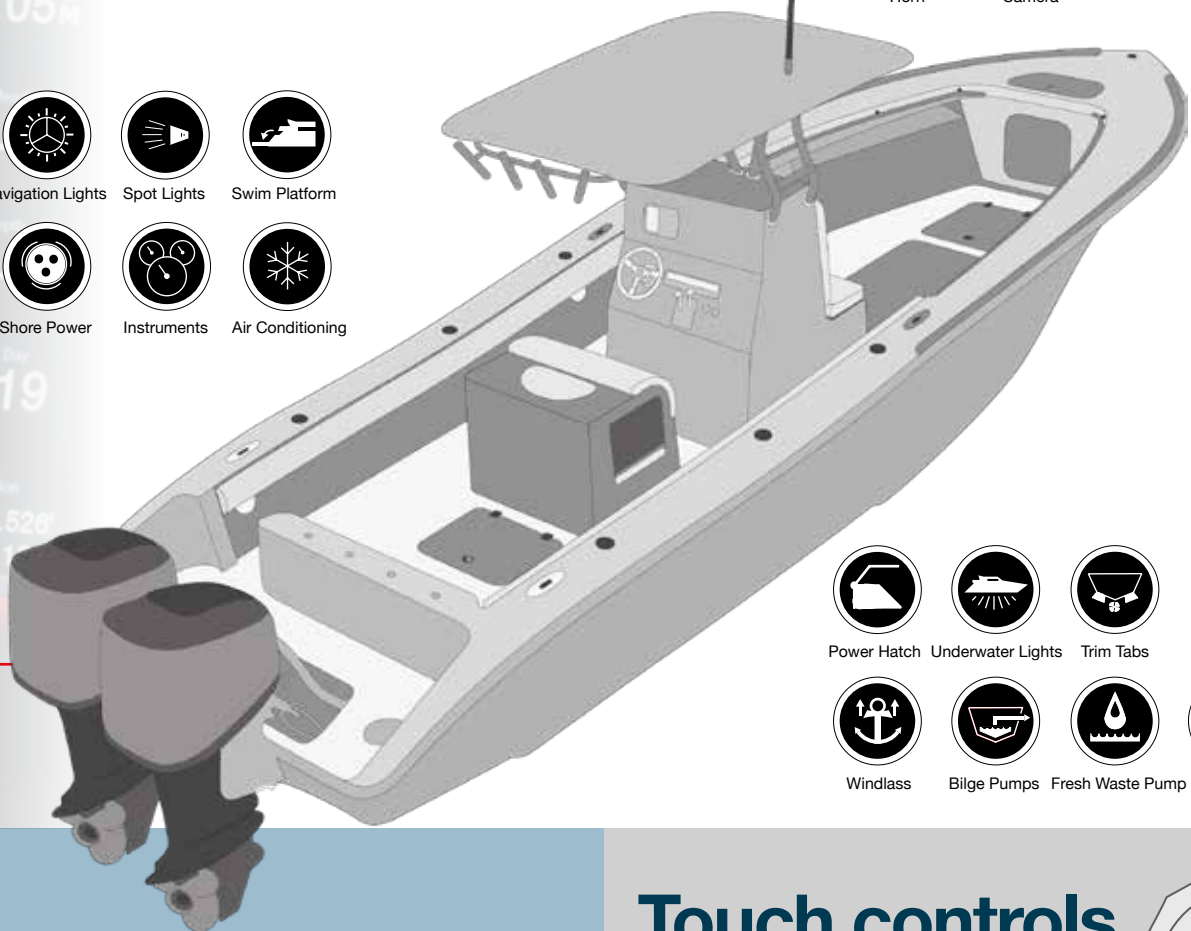

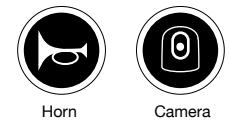

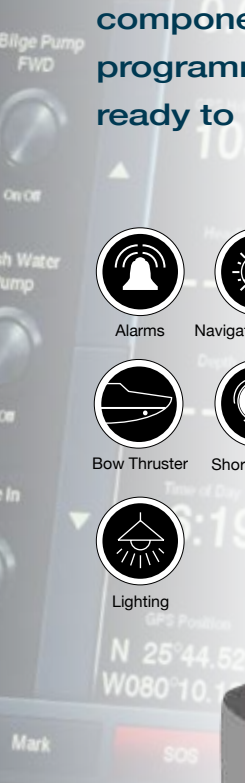

# MDI ... increases manufacturing throughput with

## Features and benefits

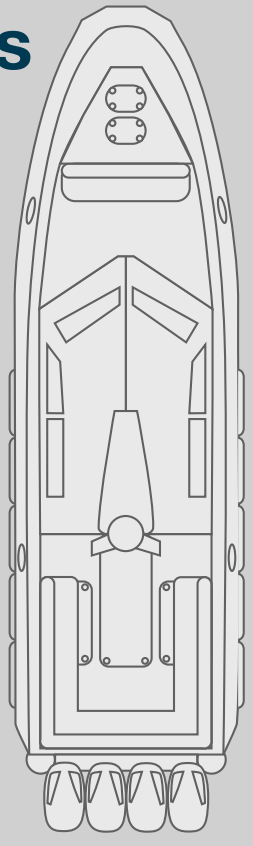

- Speeds production by reducing time required for wiring.
- “Plug n Play” systems are designed, built and fully tested at our MDI.
- Reduces wiring complexity improving reliability and reducing labor costs to install or service.
- In-house expertise provides ABYC compliant AC and DC digital electrical system designs.
- Complete electrical system design and development services.
- Integrates with Optimus steering, third party devices and other SeaStar components.
- Customized programming.
- Proprietary designs allow for unique brand specific features.
- Digital systems training and field support.
- Expert service and on-site support.
- Touchscreens replace physical switches to increase usable helm space.
- Digital displays eliminate switches and associated corrosion issues.
- Customizable modes.
- Advanced troubleshooting and diagnostic reporting.
- Integrated Vessel Control simplifies ride control.
- Optional remote connectivity (Telematics).
- iPad, iPhone and Droid control.

Imagine controlling all of your electrical components via one simple, programmable, touch screen system... ready to plug and play

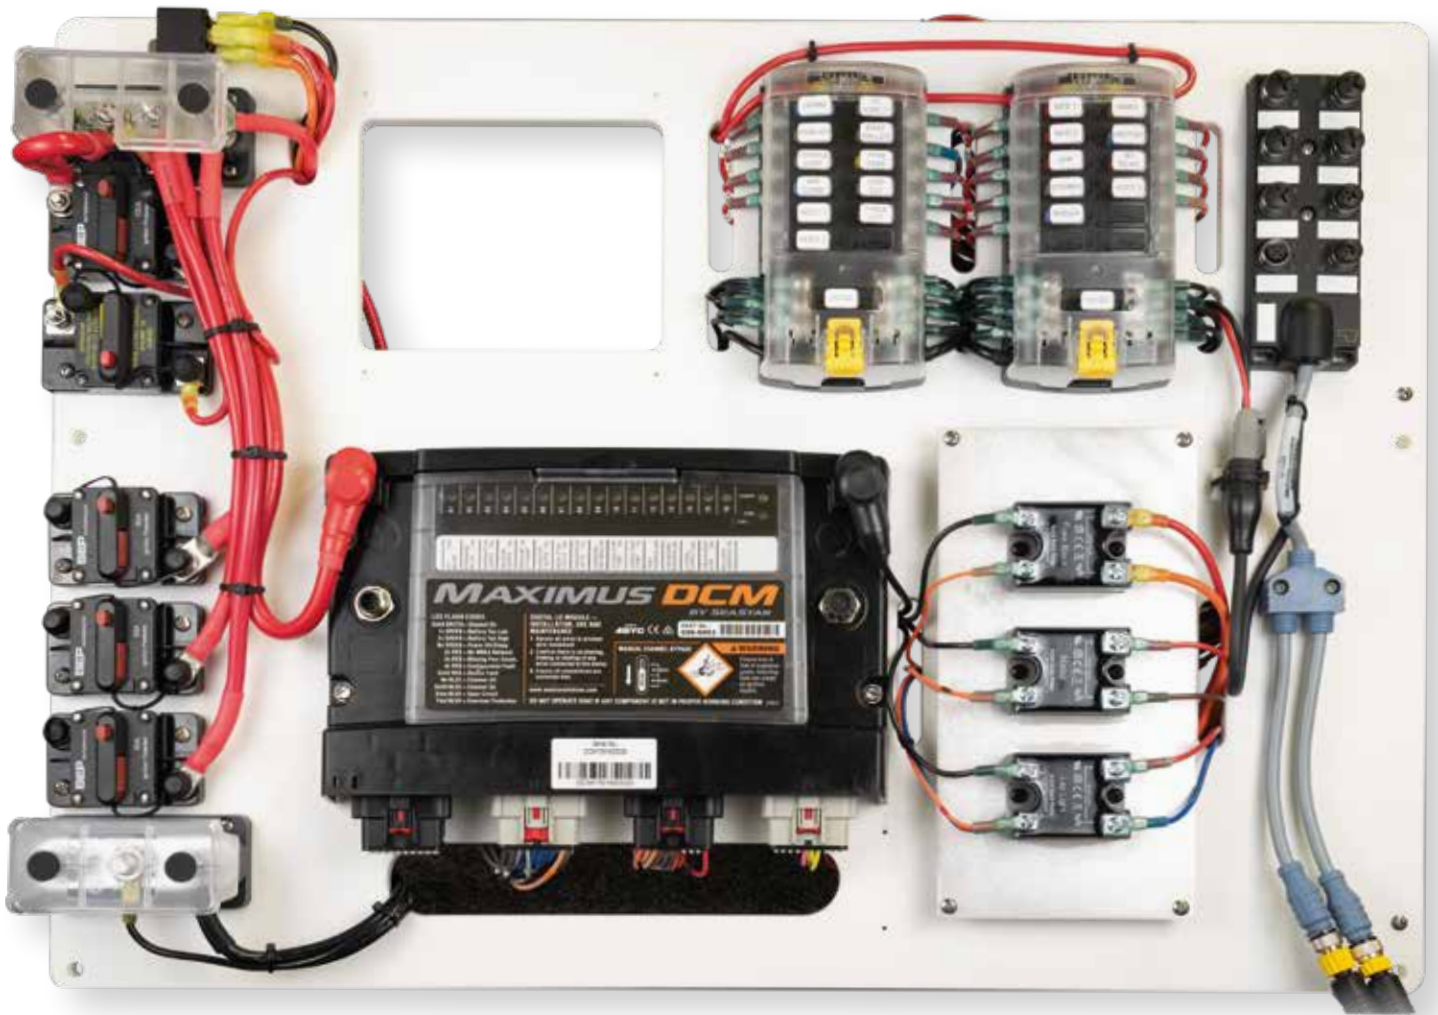

## Touch controls

- Mood lighting
- Dimming control
- Notifications/Alarms
- Battery monitoring
- Load shedding
- Baitwell control
- Climate control
- Entertainment control
- Automatic AC mains switching
- Freezer Plate control

# Complicated wiring made simple

...ready to plug and play
