# HYDRAULIC POWER STEERING AND DC POWER UNIT PHASE OUT NOTICE

Dometic Marine (formerly SeaStar Solutions) would like to inform you of some important changes which will be occurring this year to our traditional hydraulic power steering product offering. The decision has been taken to phase out of our hydraulic power steering products which can be replaced by Optimus 3000/4000/5000 Electronic Power Steering systems.

This decision has not been taken lightly and has been under review for quite some time. The emergence of our Optimus EPS steering products as a far superior replacement for these applications, has drastically reduced the volumes and we feel now is the time to start the phase out process to discontinue offering these products for sale. We have every intention to give customers ample opportunity to place last time buy orders for these components, We will continue to offer service parts for the systems out in the field and we will warrant any eligible systems in the field until the warranty period has expired.
